

SELIM AISSI

Senior Vice President & Chief Information Security Officer
ICE Mortgage Technology

Selim Aissi is Senior Vice President & Chief Information Security Officer at ICE Mortgage Technology (previously Ellie Mae). He is responsible for IMT's Security Engineering, Operations, Strategy, Cyber Resilience, Thirty-Party Risk, and GRC.

Before joining Ellie Mae, Selim was the Vice President of Global Information Security at Visa. In that role, Selim transformed Visa's information security program into the industry leader, led critical security programs including product security innovation, and enabled global growth and datacenter expansion. He also led the definition of security technologies for protecting Visa's data, networks, data centers, digital wallets, applications, end-point devices, and other core capabilities for corporate network as well as issuer- and consumer-facing products and services. Selim was recognized for leading company-wide Security Initiatives including ApplePay, Visa's APAC Data Center, and Visa's Data Protection Programs.

Previously, Selim spent over 11 years at Intel where he held senior management and technology roles and championed several security technologies for Intel's server, desktop, and mobile products. Prior to Intel, Selim held senior engineering positions at General Dynamics - Land Systems Division (M1A2 Battle Tank Vehicle Electronics), General Motors (Embedded Software Center of Excellence), and Applied Dynamics International.

Selim earned his B.S., M.S., and Ph.D. engineering degrees from the University of Michigan, Ann Arbor. He is a Certified Information Systems Security Professional (CISSP), Senior Member of IEEE, and member of ACM and ISACA. He holds over 100 patents in various areas of computer and information security.

Selim has served as a Board Member for several Startups, Venture Capital firms, and Security Institutions, including FS-ISAC MRC, State of California's Cybersecurity Task Force, National Technology Security Coalition (NTSC), UC Berkeley CISO Institute, Bay Area CISO Executive Governing Body, and CISO Magazine. He co-authored the book Security for Mobile Networks and Platforms (Artech House).

Selim has also been recognized by his peers for security innovation and leadership and received several awards including the 2019 CISO of the Year Award, Top 100 Global CISOs, and Most Influential CISOs.
